7 qt. SinAqua™ Souper

PERFORMANCE

The SinAqua™ Souper is a portable countertop unit from CookTek used for rethermalizing food and precision holding. Employing a forward-thinking design and high-contrast, easy-to-use capacitive touch control, the SinAqua™ Souper can take liquid foods from an unfrozen, chilled state through the food safety danger zone in as little as 45 minutes.[†] After rethermalization, food is held at a precise temperature within a selectable range of 140–200°F / 60–95°C. Utilizing CookTek inductive heating technology, the SinAqua™ Souper consistently heats food without scorching and holds food twice as long as steam wells, while using less than half the energy. The SinAqua™ Souper eliminates maintenance and plumbing associated with traditional soup warmers.
